

Our latest revolutionary idea in scanning?

A healthier CT system for your patients. Introducing the new SOMATOM Definition Flash. Flash speed. Lowest dose.

Our vision of greatly improving patient care has been realized, with a scanner that takes our unmatched Dual Source technology to a whole new level, and is set to change your perception of radiation dose. With the fastest acquisition speed in CT history, split-second scanning of the thorax, heart, or both is a reality. For the first time you can acquire regularly the whole heart at below 1mSv, and have Dual Energy with just a single dose.
