Global Siemens CEO visits Saudi Arabia to celebrate Saudi Aramco's 75th Anniversary

Dahran, June 3rd, Siemens Ltd - Saudi Arabia announced that Peter Löscher (President and CEO) of Siemens Global is visiting Saudi Arabia, to congratulate Saudi Aramco on their 75th Anniversary under the theme "Energy for Generations".

Dahran, June 3rd, Siemens Ltd - Saudi Arabia announced that Peter Löscher (President and CEO) of Siemens Global is visiting Saudi Arabia, to congratulate Saudi Aramco on their 75th Anniversary under the theme "Energy for Generations".

During his visit to the dignitaries of Saudi Aramco in Dhahran with Mr. Khaled Al-Faleh, Senior Vice president of Saudi Aramaco, Mr. Löscher expressed his pleasure to be here and presented Saudi Aramco with Siemens Generation 21 scientific boxes as a gift for their 75th anniversary. The discovery box is a worldwide education program created by Siemens composed of 22 experiments on topics of Energy, Electricity, Environment and Health, that will provide support for children of preschools. It is comprised of experiments in science and technology and provides fun teaching materials.

“Today we come to give thanks and refer to 'Saudi Aramco's core values and the efforts it had made to help promote education”, said Mr Loscher. “Saudi Aramco has always been a vitally important partner with Siemens and the commemoration is also an occasion for Siemens to reiterate its commitment not just to Saudi Aramco but to the Kingdom”, he added.

Saudi Aramco signed its first concession agreement in the Kingdom in 1933, since the nascent era of oil production in the Kingdom, later on Siemens and Saudi Aramco have co-sponsored many projects strengthening their historic ties and boosting their mutual benefits in energy and industry. Through this cooperation Siemens has ensured technology transfer for the benefits of Saudi Aramco and Saudi society as whole. Siemens have implemented projects to build and strengthen the country's infrastructures through out all partners including Saudi Aramaco.

Siemens is a top innovation & technology provider in many infrastructure area such as industry,

Siemens in the region traces its beginning back to the early 1850s when Siemens laid deep sea cables between Britain and Alexandria and a section of telegraph line to India through Red Sea for the British Government. In 1930s visionary local businessmen first imported Siemens power generation equipment to Saudi Arabia. This initial investment laid the foundation for the sophisticated power infrastructure found today in the country. Countless pioneering projects attest to the partnership between Saudi Arabia and Siemens in shaping the future.

With the founding of Siemens Ltd. in 1999, Siemens and Juffali strengthened their commitment to excel not only as a network and solutions provider but also as a preferred partner for their customers and a sought-after employer in Saudi Arabia. We also operate in Saudi Arabia as Arabia Electric Limited (Equipment) and ISCOA.

The company has linked people and businesses with its cutting-edge Information Technology products and solutions; made power generation & distribution more efficient; increased productivity by creating innovative solutions for industry and automation and helped optimize patient care within innovative devices, systems and solutions in the health care field.
